## Research Interest

Insurance, Demographic Economy, Older Workforce, Ageing Policy, Gender, Causal Analysis

## Research Experience

<b>How the development of pension affect divorce rate in China (Final Paper)</b>	Good(86/100)
<ul style="list-style-type: none"><li>• <b>Background:</b> Investigated the influence of pension on marital decisions, drawing from the "Three Steps" Marriage Quality and Public Economic Theory focus on the role of government in economic activities and welfare provision.</li><li>• <b>Methodology:</b> Screened data from 31 Chinese province by SQL. Employed OLS, FE, and RE models in Stata to examine the relationship between old-age insurance and marital decision-making, accounting for regional differences.</li><li>• <b>Results:</b> Found a correlation between advancing old-age insurance and higher divorce rates. Recommendations included implementing community elderly care models and enhancing welfare.</li></ul>	
<b>Research on the Effect of Aging on old-age insurance Expenditure (Final Paper)</b>	Satisficed(5/5/5)
<ul style="list-style-type: none"><li>• <b>Background:</b> Explored how old-age insurance evolves in response to aging trends, considering societal behaviors and family factors based on redistribution and fiscal theory.</li><li>• <b>Methodology:</b> Analyzed ten years of old-age panel data, selecting indicators, and conducting empirical and heterogeneity analyses.</li><li>• <b>Results:</b> Confirmed significant influence of aging on old-age insurance choices. Recommendations included creating elderly employment opportunities and fostering collaboration between the public and government for effective social policies and adaptive family structures which can improve economic outcomes.</li></ul>	
<b>Research on structure of class hierarchy based on street food in Korea</b>	
<b>(Dankook University Exchange Student)</b>	Satisficed(90/100)
<ul style="list-style-type: none"><li>• <b>Background:</b> Explored class hierarchy in Korean street food culture to understand consumer behavior and economic trends.</li><li>• <b>Methodology:</b> Collected data from brick-and-mortar merchants using structured questionnaires. Categorized merchants and modeled guest income, validating findings with survey data.</li><li>• <b>Results:</b> Uncovered associations between individuals' food choices and social class, influenced by factors such as income, social status, and evolving social stratification trends. Highlighted wider societal implications of food consumption behaviors.</li></ul>	

## Work Experience
